

Figure 1 is an electrical wiring diagram for a parking auxiliary module. It shows the power supply from a battery (蓄电池) through a main fuse (F1/17, 100A) and a parking fuse (F2/13, 20A). The diagram details the connections for the parking radar (倒车雷达) system, including the radar switch (倒车雷达开关) and the radar unit (C13 倒车雷达). The diagram also shows the connections for the parking lamp (倒车灯) and the parking indicator (倒车灯指示).
