

The diagram illustrates the electrical system for an engine compartment, featuring the following components and connections:

- Power Sources:** Alternator (12/3, 10A), Battery (12/20, 10A), and a 12V/20 40A battery.
- Water Pump:** Connected to the alternator and battery via a relay (K1/1) and a fuse (F1/1).
- Sensors:** Includes a pressure sensor (压力传感器) and a temperature sensor (温度传感器).
- Relays and Fuses:** Various relays (K1/1, K2/1, K3/1) and fuses (F1/1, F2/1, F3/1) are used to control the system.
- Wiring:** The diagram shows the routing of wires between components, with labels for wire colors (e.g., 12/3, 10A) and terminal numbers (e.g., 1, 2, 3).

A large green watermark "www.car60.com" is overlaid on the diagram.
